

# Minerva Agriculture Technology and Consultancy

EU & national project development · Adana, Türkiye

## Who we are

Minerva is a project development consultancy founded in Adana in 2023. We design fundable projects, build the consortia around them, and carry them through coordination and reporting. Our thematic ground is agriculture technology, rural development and vocational training. We work as a coordinator and as a partner.

## Organisation identity

## What we deliver in a project

- Project design & application writing — Concept development, needs analysis, logical framework, work packages, budget and full narrative.
- Project management & reporting — Partner coordination, interim and final reporting, financial follow-up, quality assurance.
- Thematic content — Precision agriculture, water efficiency, climate-smart practices, cooperatives, rural youth, food security.
- Curriculum & training material — Modules mapped to EQF learning outcomes, trainer guides, assessment rubrics, open educational resources.
- Local hosting in Adana — Pilot trainings, workshops, demonstration days and partner study visits, with farmer and cooperative access.

## Where our role ends

We do not operate drones, install irrigation or sensor hardware, issue accredited certifications, or perform laboratory analysis. Where a project needs these, we bring in the specialist supplier or accredited body.

## Programmes

Erasmus+ (KA210 / KA220) · Horizon Europe · Interreg · TÜBİTAK national and bilateral calls

## Core team experience

Our team has designed and managed projects funded by GIZ, ILO, FAO, UNHCR, IOM and Interreg within municipalities, cooperatives and technology development zones, plus Enterprise Europe Network (COSME), Horizon 2020 and TÜBİTAK programmes. These are the institutions' projects, not Minerva's own — we present them as evidence of the people, not the company.

## Documents on request

Legal entity form · financial identification form · signed mandate · trade registry gazette extract · tax certificate · signature circular. Financial capacity details shared directly with partners.
